

Intra Aqua Acid

Did you know that acidification can support a healthy gut microbiota?

INTRA AQUA-ACID MINERAL: EARLY-DEFENCE APPROACH

Complete suppression of pathogens from poultry production is a challenging task. An early-defence approach by creating an unfavourable environment for microbial growth in the crop and stomach have proven to be effective preventive measures.

This can effectively be achieved by drinking water acidification.

5 REASONS TO CHOOSE INTRA AQUA-ACID MINERAL

- ✓ A premium unique organic blend with a dual mode of action for optimal gut environment
- ✓ Supports microbial balance and poultry performance
- ✓ Helps to reduce moisture levels in feces
- ✓ Benefits protein enzyme functioning which promotes optimal protein utilisation
- ✓ Highly bioavailable chelated zinc to support of gut wall integrity

Salmonella can **SURVIVE** 115 days in water and E. coli up to 11 weeks in excretions

An increase of stomach pH from 2 to 3 decreases protein enzyme activity by **30%**

Low pH in the proximal gut serves as a frontline **DEFENCE** to the entry of pathogens

INTRA AQUA-ACID MINERAL SUPPORTS ANTIBIOTIC REDUCED POULTRY PRODUCTION

Intra Aqua-Acid Mineral is a drinking water based supplement within our **Intra Nutrients Programme**. Benefits of this programme includes precision nutrition and continuous supplement intake via drinking water and ease of use via flexibility of dosing.
