SE & VITAMIN E

Did you know that oxidative stress is a **silent threat** to poultry health?

## INTRAMINERAL SE & VIT E: ANTIOXIDANTS TO THE RESCUE

Oxidative stress from free radical formation is a problem in poultry production worldwide. Caused by various factors, it is a silent threat to not only animal health, but also farm productivity.

To protect poultry from excess free radical damage, high quality and stable forms of antioxidants need to be supplemented to give poultry the protection they require.

## 6 REASONS TO CHOOSE INTRAMINERAL SE & VIT E

- ✓ Premium supplement: highly concentrated Vitamin E (20%) and Selenium
- ✓ Excellent behaviour in water
- ✓ Prevents negative effects of free radicals with its strong anti-oxidative capacities
- ✓ Maintains optimal immune system function
- ✓ Supports optimal fertility for breeder poultry
- ✓ Helps the production of meat and eggs of optimal quality

**FREE RADICALS** are like robbers, they snatch energy from other cells thereby damaging them

Vitamin E and Selenium are effective alone but are enhanced in a dual combination

**1+1=3**

Precision Vitamin E and Selenium nutrition via drinking water at specific times to fit animal needs

INTRAMINERAL SE VIT E SUPPORTS HIGH QUALITY FOOD PRODUCTION AND REDUCES FOOD WASTE 

**Intra Mineral Se & Vit E** is a drinking water based supplement within our **Intra Nutrients Programme**. Benefits of this programme includes precision nutrition and continuous supplement intake via drinking water and ease of use via flexibility of dosing.
