DUO

Have you discovered the power of organic minerals to reach optimal growth potential?

INTRAMINERAL DUO: EFFECTIVELY ABSORBABLE TRACE MINERALS

Trace mineral supplementation in livestock helps to improve performance and maintain the welfare of the animals. The addition of well soluble minerals to drinking water not only ensures consistent and constant supply when necessary, but the organic form of the minerals also provide better absorbability and bioavailability.

4 REASONS TO CHOOSE INTRAMINERAL DUO

- ✓ Concentrated trace mineral supplement for use in drinking water
- ✓ High mineral bioavailability
- ✓ Does not pollute the system
- ✓ Easily dosed, no pre-solution necessary

ZINC not only plays a role in immunity, but also in skin repair and hormone functioning

COPPER is necessary for good skeleton and feather formation

Inflammation can cost up to **30% OF GROWTH POTENTIAL** due to the activation of the immune system

INTRAMINERAL DUO IS OPTIMIZED FOR DRINKING WATER SUPPLEMENTATION

Intra Mineral Duo is a drinking water based supplement within our **Intra Nutrients programme**. Benefits of this programme includes precision nutrition and continuous supplement intake via drinking water and ease of use via flexibility of dosing.
